25 April 2016

Dear Customs Officials:

The contents of the shipment are accessories and cylinders with natural air for an international inter-comparison experiment of a trace gas in the ambient air, which is a scientific collaboration under the World Meteorological Organization (WMO)/ Global Atmosphere Watch (GAW) Programme. This experiment is designed to help us better understand greenhouse gases and climate issues. The cylinders contain natural ambient air (breathing air) for the measurement collected by Korea Meteorological Administration in the Republic of Korea and will be returned to the Republic of Korea after the measurement is completed. None of the pieces in this shipment will be/has ever been used for commercial purpose.

Thank you.

Haeyoung Lee
